THE COMPANY- FIGURE OUT

HISTORY

Figure Out is a company located in Oporto with the know-how on creating innovative technology tools to simplify the life of everyone.

CONCEPT

The concept of Figure Out is a brand oriented to new forms of investigation, focusing on providing useful solutions to modern problems.

MISSION

The ability to communicate with people from different countries and in different languages is increasingly important to the professional and personal life of everyone. Oftentimes is a big challenge to the people be able to express themselves in other language so it's important to have easy and practical technological tools to solve it.

The mission of Figure Out is simple, provide easy and reliable technological tools to simplify the life of many people. The application mission is to deliver a practical and easy to use application that people can use to translate languages with the most modern and best translation technologies of the market.

VISION

Develop a simple and practical application that can solve a problem of many people is a motivation to the development team.

The strong team spirit, the talent of each developer and the good know-how of each member express a big motivation to find new improvements on the app in order to satisfy all people needs in the context of the problem.

VALUES

Design – User friendly interfaces.

Elegance– Every application is composed in harmony with each element.

Teamwork - The team is enthusiast and with teamwork they always reach their objectives.

Continuous Learning – Through the development we will learn with the mistakes to improve the methods and techniques.

Critical thinking – Every idea can be crucial to the project.

BRAND IDENTITY

The brand Figure Out is a brand oriented to the satisfaction of the market needs, with the latest technology.

General resources: human, technology, financial

    a. Miguel Lemos (Team leader)
    b. Jadir Lino
    c. Cassandra Ranginha
    d. Hugo Ferreira

2. TECHNOLOGICAL

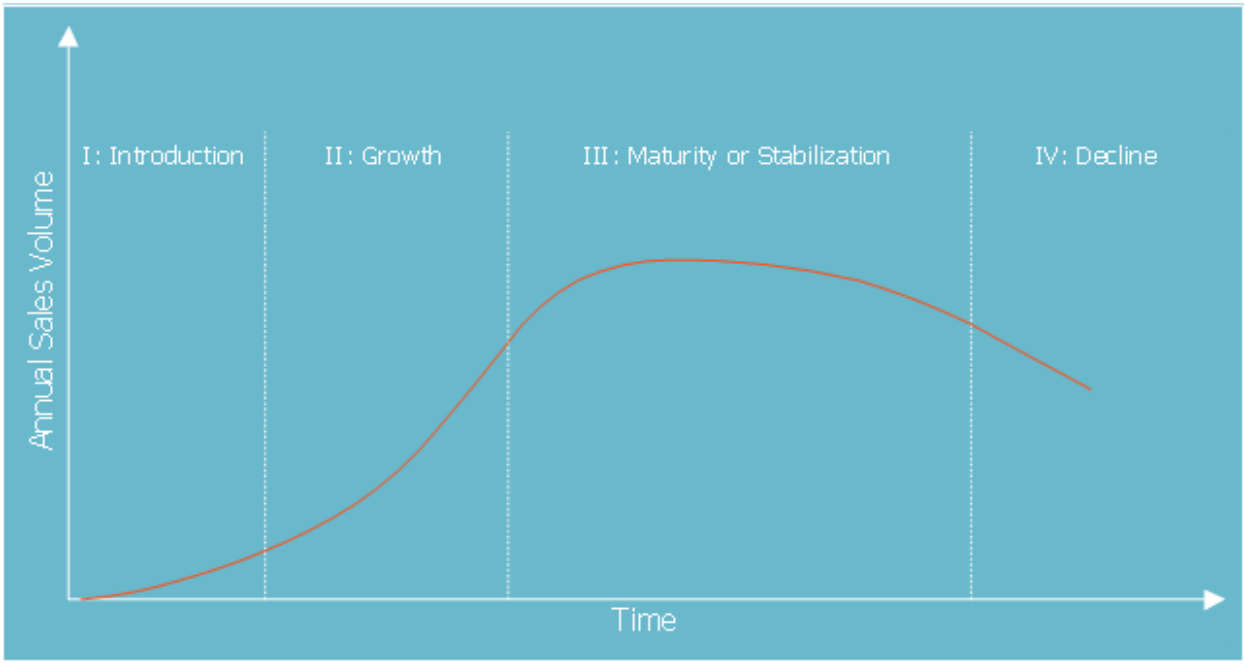

The technologies used during the development of the project will be Ionic, WebGL, Firebase and Google API's.

3. FINANCIALS

The application is being developed under academic context the real spend in developing the application is only time consuming. All the team members have no income for developing the project.

Through the analysis of the company environment

The product life cycle will depend on market evolution and competitor's response. The product is not an innovation but rather a compilation of many existing apps, so it may or may not be well received by the application users. It will also depend on user needs for the app, since it mostly targets users with verbal needs or can't translate from other languages to their main one.

Analyze surrounding environment

Our Customers

Now, Figure Out doesn't have any clients, due to the fact it's being developed. Although, potential customers might be people that need to translate anything during any trip or have any verbal/audition condition.

Our competitors

Our main adversary in our area of solution development is Google, with the creation of the Google Lens solution. This application is used to translate, in real time, a picture to text or audio.

Situation in the long term

Non-financial

It's pretended that throughout the time the app recognized as one of the best apps in the play store and apple store. Also, we pretend to encourage the people that travel regularly to other countries to use the app.

We hope to get sponsors with travel agencies in order to promote the application. With this we want to achieve a good position the market.

Financial objectives

Its expected in the first 6 months the return of the money invested (around 240 000 euros). After that, a support team will have to be arranged in order to provide continuous support for the application and work on improvements.

In the first year after launch, is expected a profit around 130 000 euros (around 30% of the total earnings of the first year).

After that, new values will have to be calculated taken in consideration the values of the first year.

Marketing mix of the company

Product: The developed application will help the user to translate whatever he needs.

Process: The application will be available in the FigureOut website to download by the user.

Price: The application will be available without a cost.

Place: The application will be available in the FigureOut website to download by the user.

Promotion: In the FigureOut there will be available a promotional video, where the main features of the application are explained.

Swot

Strengths	Weakness
• Low cost. • Convenience and ease of access to our services. • User friendly. • Mobile application for IOS and Android;	• Already multiple mobile applications are available. • Fast changing market.
Opportunities	Threats
• Formation of partnerships with several entities. • Rapid growth in the market;	• Competitors applications (ex: Google Lens) • Piracy. • Possibility of Android technology falling into disuse. • Possibility of iOS technology falling into disuse

General strategies

Out application in include an option available where text can be translated to sign language. The current applications that are our main competitors don't include this option and, this way, he can distinguish and improve our translation application in the current market.

Action plans

The product being developed is a mobile application, Android and iOS, that will be available in the Google Play store for Android devices and Apple Store for iOS devices, while also being available in the FigureOut website.

After the product is developed, the main objective is to produce publicity posters and arranged business partners and sponsors. Besides that, more publicity will be made available in social media, like Linkedin and Facebook.

Factors – key of success

The main factor of success, and that set apart the FigureOut application, is the text conversion to sign language. Currently, the available applications don’t take in consideration this type of translation, meaning that this is a market that is viable to explore, while providing accessible, modern and easy to use solutions.
